HOW IT STARTED

With this vision in mind, the creator JM launched The American Dream ($ADREAM) in November 2021. A passionate community of believers soon started to take shape as crypto enthusiasts joined together.

From the early days of ADREAM, we became known as the Dream Team, both amongst ourselves and across countless other platforms. This wasn't just a name. For many it became part of their username, their handle, and their avatars/profile pictures.

Whether you are new to dreaming or have been living the dream since the start, if you fly under the American Dream banner, you embrace our founding principles.

- We started from zero, with zero. It's the spirit of the project to create something from nothing.
- We were not a preassembled team, the community upon which we were founded struggled because of the pump and dump meme craze during Elon Musk's SNL appearance. This inspired JM to help others actually obtain the promises of that of community and obtain The American Dream. The brilliant minds behind ADREAM had never collaborated before let alone spoke previously. They are a fresh team of developers, designers, moderators, marketers, and shillers. When you joined the Dream Team, from anywhere in the world, you found where your talents could be used best, and got to work
- Just because it's called The American Dream does not mean you can't obtain it from anywhere in the world. Every culture knows The American Dream but we want to see everyone of every culture obtain their own version.

We are proud of where the Dream Team originated and are equally excited for our future. Our Founder, JM, chose to Start the American Dream Token from nothing and gave direction of the currency of our team.

Starting with nothing means everyone has to bring something to the table. The holders and believers in the Dream Team have and will be the source of all our success
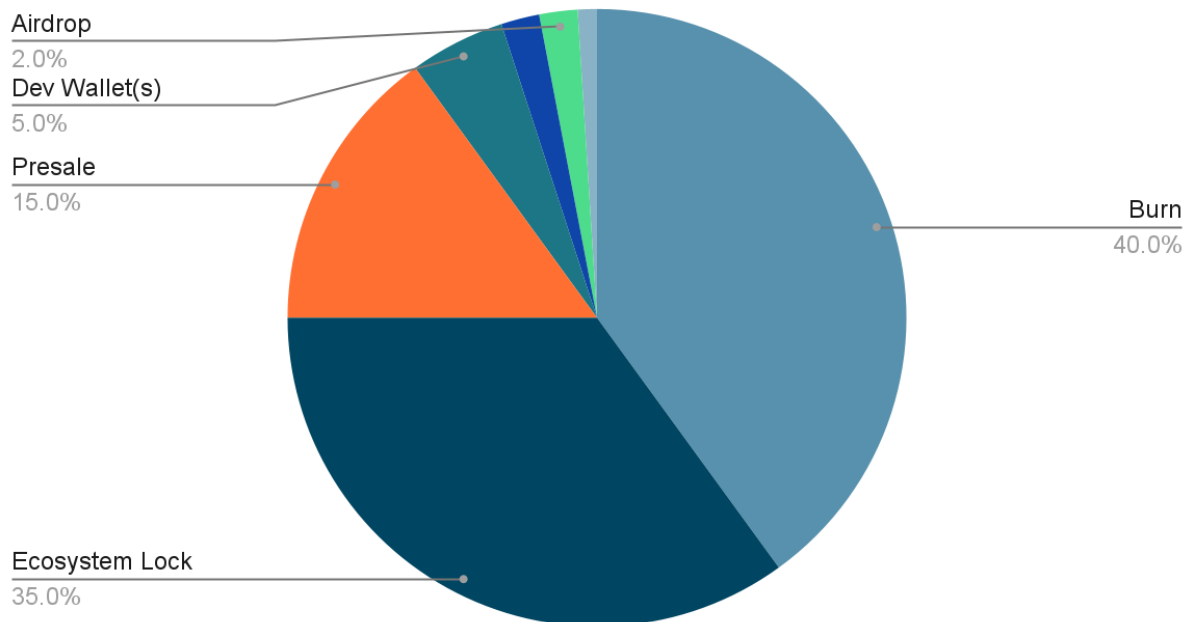

Tokenomics & Distribution

Tokenomics

14% Total Buy/Sell Tax.
8% Towards Rewards to Holders
3% Towards Liquidity.
2% Salary
1% Towards Marketing wallet.

☐ **Phase 5**
- ☐ Continued work towards helping the world obtain their dreams!!! A lot more to come including **DreamLaunch** and **DreamInvest**

<u>DREAMSWAP PLATFORM</u>

We are dedicated to building the best Decentralized Ecosystem (DECO) on the planet. Our Three tokens shall be the seeds of which the DREAMSWAP ecosystem sprouts and how it will dig its roots. $ADREAM token is the foundation of the project, there will be another token designed for governance, and another dedicated as seed money for community-based startup projects.

The goal of DREAMSWAP is to provide a safe place to trade your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to grow exponentially. We will constantly scale this ecosystem so that it may bring ever-increasing interested parties to the DREAMSWAP platform.

Our unique tokenomics, solid design, technical implementation, and the-viral growth from our good 'ole fashioned, resilience will reinforce the platform's strength and ultimately provide residual benefits to the ecosystem.

Making a swap without a budget is a unique challenge but by tackling various genres and product lines, a focused development team will rise from the ranks of our community.

We know that with our unified force, and the power of ADREAM, we will be successful in advancing the Swap and Ecosystem as a whole, so that we reach new and spectacular heights together.

THE BEST IS YET TO COME!!!

DREAMCHART

The vision of DreamChart is that it will be built with the intention to keep investors a little more safeguarded from rugs and scams than what is currently available. Project owners will be required to manually submit their projects and verification it is their project to the DreamChart platform. There will be security measures in place to ensure that this is as safe as possible in the decentralized space. Investors will be able to chat with each other on the crypto projects listed with the chart in view allowing organic positive discussions as well as a self-moderated community for the unforeseen hiccups that could happen in the crypto space. Effectively allowing investors to discuss projects while watching the chart move in real time.

DREAMLAUNCH

DreamLaunch is a ground up rebuild of the entire launchpad process in the crypto space. Increasing modularity of the contract writing process coupled with a more individualized and personal approach we intend to provide groundbreaking and revolutionary projects a chance to truly receive the opportunity they deserve in this space coupled with a launchpad and fair launch platform allowing Devs and investors alike an accelerated likelihood to connect and grow.

DREAMINVEST

DreamInvest is the part where you get to change the world. Governance token holders with have exclusive rights and access to small businesses around the world trying to get funded for their startups. These project owners will need to submit detailed information about their vision along with interviews and the community will review the information and decide whether or not we will make their dreams come true. It could be something as simple as funding a coffee shop or we could be the project that funds medical or scientific research that changes and develops our world into the place we want it to be.
